Summary

Simple holder for round chalks (here scaled so it fits ⌀11.5 mm Hagoromo chalks)

Household > Office

Tags: chalk chalkholder

Simple and elegant holder for round chalks with securing mechanism.

The files are scaled so they fit original Hagaromo chalks (diametr 11.5 mm) but they can be easily rescaled for use with chalks with other diameters.

This model was originally intended as a gift for someone so the printed models shown in the photographs are inscribed with letters, however that is not the case for the enclosed 3D files.

Model files

holder_v2.stl

☐ more rigid than v1, also the nut fit should be tighter

nut_round.stl

☐ scale along x a y axis if the nut is too tight or too loose; same as bellow but rounder

---

holder.stl

☐ I recommend printing it with raft or brim; also you might want to decrease retraction by few mm

---

nut.stl

☐ scale along x a y axis if the nut is too tight or too loose
